| **Climate Justice Working Group** | S 6599: Climate Leadership and Protection Act | New York State Department of Environmental Conservation | The Climate Justice Working Group is comprised of representatives from Environmental Justice communities statewide, including three members from New York City communities, three members from rural communities, and three members from urban communities in upstate New York, as well as representatives from the State Departments of Environmental Conservation, Health, Labor, and NYSERDA. The Working Group will help the Climate Action Council develop plans to invest or direct resources in a manner designed to ensure that disadvantaged communities receive at least 35 percent, with the goal of 40 percent, of overall benefits of spending on:  
• Clean energy and energy efficiency programs  
• Projects or investments in the areas of housing, workforce development, pollution reduction, low-income energy assistance, energy, transportation, and economic development |
| **Disadvantaged Communities Advisory Group** | SB 350: Clean Energy and Pollution Reduction Act | California Energy Commission | Pursuant to SB 350 (2015) and codified in Public Resources Code Section 400, the CPUC and the California Energy Commission established a "...disadvantaged community advisory group consisting of representatives from disadvantaged communities. The group shall:  
• Identify priority programs or subject areas which impact disadvantaged communities  
• Advise on potential benefits and impacts related to design and implementation of Clean Energy programs  
• Advise on measuring program effectiveness |

<table>
<thead>
<tr>
<th><strong>Equity Framework</strong></th>
<th><strong>Summary of Equity Framework</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>California Energy Commission, California Public Utilities Commission, and broader scope</td>
<td>The Equity Framework can be applied across all climate related policies, bills, proceedings, requests for proposals, etc. to ensure that equity is front and center when considering any climate investment/intervention in the State</td>
</tr>
<tr>
<td><strong>Framework for Equity in New Mobility</strong></td>
<td><strong>Framework</strong></td>
</tr>
<tr>
<td>-----------------------------------------</td>
<td>---------------</td>
</tr>
<tr>
<td>TransForm works toward a future where the needs of vulnerable populations with limited mobility (low-income, people of color, the disability community, seniors, and youth) are central in transportation planning. It provides a framework for evaluating the social equity impacts of new mobility projects and programs, and several recommendations to ensure new mobility does more good than harm. The framework below is a starting place that can be tailored to meet the needs of communities:</td>
<td></td>
</tr>
<tr>
<td>• Increased access to opportunity</td>
<td></td>
</tr>
<tr>
<td>• Affordable options</td>
<td></td>
</tr>
<tr>
<td>• More healthy and safe communities</td>
<td></td>
</tr>
<tr>
<td>• Reduce income inequality and underemployment</td>
<td></td>
</tr>

<td><strong>California Public Utilities Commission</strong></td>
</tr>
<tr>
<td>----------------------------------</td>
<td>--------------------------</td>
<td>------------------------------------------</td>
</tr>
<tr>
<td></td>
<td></td>
<td>This program within the SGIP provides incentives for projects that provide resiliency benefits to customers or communities facing risks of wildfire (Resiliency Budget) in the state. The incentive level is $1000/kWh. The CPUC explicitly stated in their final decision that the intention was to set the incentive “level likely to fully or nearly fully subsidize the installation of a storage system”. The initial Equity Resiliency budget will be set at $100 million, which may increase further with the implementation of SB 700. The initial distribution of the budget by utility territory will be set at: $44m for PG&amp;E, $34 million for SCE, $13 million for SDG&amp;E, and $9 million for SoCalGas.</td>
</tr>
</tbody>
</table>

Eligibility criteria:

- **Residential customers:** “the Commission should define residential customers with critical resiliency needs as customers that: (a) are located in a Tier 3 or Tier 2 HFTD; and, (b) are one of the following: (i) eligible for the equity budget; (ii) a medical baseline customer; or (iii) a customer that has notified their utility of serious illness or condition that could become life-threatening if electricity is disconnected.”

- **Non-residential customers:** “the Commission should define non-residential customers as having critical resiliency needs if they are located in a Tier 2 or Tier 3 HFTD and provide critical facilities or infrastructure as defined in this decision for a
community that is located in a Tier 2 or Tier 3 HFTD and eligible for the equity budget.* Page 117 of the CPUC decision lists the specific types of non-residential critical resiliency needs customers that qualify.

- Residential and non-residential customers who have experienced, and been affected by two or more Public Power Safety Shutoffs (PSPS).

</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>This bill is intended to continue implementation of AB 32 by directing resources to disadvantaged communities. Requires EPA to identify communities based on disproportionate effects of pollution and high concentrations of low income, high unemployment, and low levels of educational attainment. The investment plan should allocate 25% of funds to projects that will benefit these communities and 10% of funds to projects within the communities. The funding guidelines should maximize benefits for disadvantaged communities.</td>
